

Consulting Proposal: Operational Efficiency Improvement

Date: June 23, 2025

To: ABC Manufacturing Ltd.

Optima Consulting Group is pleased to submit this proposal to ABC Manufacturing Ltd. to provide consulting services aimed at improving operational efficiency. Our proposed engagement will focus on identifying inefficiencies in manufacturing processes and implementing strategic solutions to enhance productivity and reduce costs.

Objectives

1. Conduct a thorough assessment of current manufacturing processes.
2. Identify key bottlenecks and areas of waste.
3. Develop and implement a tailored operational improvement plan.
4. Train staff on new procedures and monitor progress over a 3-month period.

Methodology

- Initial process audit and data collection.
- Root cause analysis and benchmarking against industry standards.
- Development of tailored recommendations and implementation roadmap.
- Continuous monitoring and final report with ROI analysis.

Timeline

Phase 1 (Week 1-2): On-site Assessment & Data Collection

Phase 2 (Week 3-4): Analysis & Planning

Phase 3 (Week 5-8): Implementation Support

Phase 4 (Week 9-12): Training, Monitoring & Final Reporting

Investment

The total investment for this engagement is \$25,000, inclusive of all professional fees, materials, and travel expenses.

A 50% upfront payment is required to initiate the project, with the remaining balance due upon completion.

Closing Statement

We are confident that this collaboration will result in measurable improvements to your operations and look forward to the opportunity to work together.

Sincerely,

Optima Consulting Group
